

TalentFlow — Detailed Flowchart

End-to-end candidate and recruiter workflow • v1.0

Purpose

This flowchart documents the end-to-end TalentFlow recruitment lifecycle: authentication, candidate job discovery and application, recruiter review, pipeline movement, notifications, and the final hiring outcome.

Implemented MVP focus

The current MVP has working authentication, role-aware job access, job creation with skills, application creation, application listing, recruiter pipeline management, and persisted application status transitions. Interview scheduling and several advanced features remain roadmap items.
